SUMMARY

Computer Science undergraduate (CGPA 3.89) and full-stack developer with 2+ years of experience building web applications, REST APIs, authentication systems and production websites in the React and Node.js ecosystem. Experienced in turning business requirements into shipped products, leading backend work in a team, and deploying to production.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Vue 3, Nuxt 4, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & Data: Node.js, Express.js, REST APIs, JWT, bcrypt, MongoDB, Mongoose, SQLite, MySQL, SQL Server, Drizzle ORM, SQL

Tools & Deployment: Git, GitHub, Docker, Postman, Vercel, Render, Cloudflare, VS Code

Design: Figma, UI prototyping, responsive and user-centered design

Enterprise & Infrastructure Exposure: SAP ERP (FICO, PM, PS, BASIS), Azure, Entra, Intune, Oracle Database, NetApp storage, Fortinet, networking, OT

EXPERIENCE

SIWES / IT Intern, Information & Digital Technology 2026 – Present

Renaissance Africa Energy Company Limited, Port Harcourt

- Backend team lead on the rebuild of an internal **Meal Management System**, also contributing to frontend and integration (Nuxt 4, Vue 3, TypeScript, Tailwind CSS, Drizzle ORM, SQLite).
- Built and tested APIs with Postman; implemented authentication and protected routes using JWT, HTTP-only cookies and bcrypt.
- Collaborated through GitHub: branching, pull requests, code integration and merge-conflict resolution.
- Rotated across Applications, Hosting & Storage, Infrastructure Projects and Operational Technology, gaining exposure to SAP, Azure, Entra, Intune, Oracle/SQL Server, NetApp storage and tape backup, structured cabling and Fortinet firewall configuration.

Freelance Web Developer 2025 – Present

Independent / contract projects

- Deliver responsive websites and full-stack applications for individuals and businesses, from requirements and UI/UX design through deployment, analytics setup and handover.
- Built the corporate website for **Magnificent Gate Global**, an M&A advisory firm: responsive UI, service pages, SEO, Google Analytics and Search Console, with production hosting and DNS on Vercel and Cloudflare.
- Developed admin and content-management features for business applications, including products, categories, reviews and settings.

SELECTED PROJECTS

Magnificent Gate Global Website | Next.js/React, Tailwind CSS, Vercel, Cloudflare

Corporate advisory site delivered under a tight deadline, with reusable components, SEO and analytics.

Meal Management System | Nuxt 4, Vue 3, TypeScript, SQLite, Drizzle ORM

Production-ready rebuild of an internal tool with secure authentication and team-driven GitHub workflow.

Production-Ready JWT API | Node.js, Express.js, MongoDB, Docker

Containerized REST API with public, private and admin access levels and secure CRUD operations.

Developer Portfolio | React, Vite, Tailwind CSS, GitHub API

Responsive dark-themed portfolio with reusable components and live GitHub project data.

EDUCATION

B.Sc. Computer Science, University of Port Harcourt Expected 2027

300 Level | CGPA: 3.89
